DESCRIPTION & MODE OF OPERATION

An attractive modern designed 16 Amp AC1 power relay in a din rail mounted modular style housing of 1.5 modules width (27mm). The relay features the facility of double deck terminals thus enabling the relay to be available also in both SPCO and 3PCO versions. Coil voltage is determined via the connection to different terminals. LEDs are fitted to indicate relay output status. All terminal details and information along with the CE mark is clearly marked on the sides of the housing.

Note: Whilst the UNI-3R is 3PCO it is not suitable for switching three phases.
