

ML-SER Transmitter Commissioning Tool

ML-SER commissioning tool is designed for easy commission and configuration of the HDH, TEHR and Round Plant room transmitter products. The ML-SER shows device-specific configuration menus when the connector is plugged in the master device.

ML-SER tool can be used for:

- Field calibration
- commissioning and configuration of Modbus communication
- commissioning and configuration of built-in control

ML-SER tool is compatible with the latest HDHv2, TEHR and Plant Room transmitter products. Please, see data sheet of the specific transmitters.
